ThermoTub®

World's Safest Heating Technology

ThermoTub is constructed with Thermosoft's patented **FiberThermics®** heating elements, the safest and most advanced heating element technology available. As fiber optics conducts light through fibers, so **FiberThermics** conducts electricity through fibers to create the healthiest, safest heat that can be installed with peace-of-mind directly below the tub's surface.

ThermoTub's heating cable advantages include:

- Dual insulated, thin heating cable facilitates integration with tub.
- Protective outer Nylon sheath resists abrasion and corrosion adding to product longevity.
- Self-fusing technology will not arc or combust.
- Fiber**Thermics** heating cables are insulated with cross-linked polymers to withstand extreme temperatures from –50°C up to 200°C.

ThermoTub®

SURFACE HEATING SYSTEM for all tubs and shower enclosures

- Featuring soothing comfort!
- Forget about fill/drain wait times!
- Uses less energy than a standard light bulb
- Heated backrest and seat
- UL Listed for the US & Canada

FIBERTHERMICS® HEATERS

- Flexible, strong & uniquely safe
- Fast pre-heat
- Heat saving insulation
- Made in the USA

CONTROL

- Smart electronics control heat level
- User-friendly push-button keypad with LED
- Plug & play installation
- Dual output quick connectors & splitters

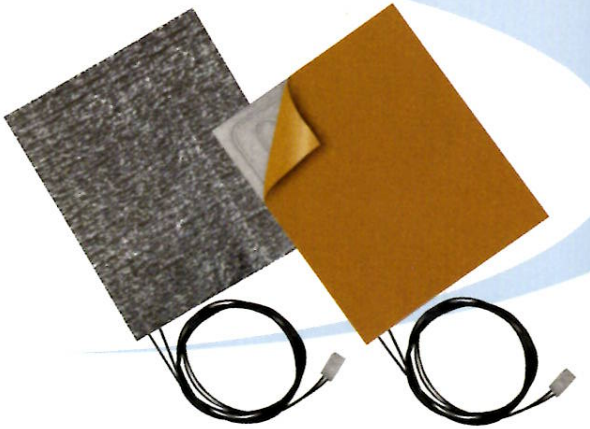
Made in USA

WHY ThermoTub® IS SUPERIOR

Most Powerful = Most Comfortable

- 96 Watts, 4 Amps maximum power
- Fastest heat-up on the market
- Insulation provides rapid warm-up & operating efficiency
- One touch temperature maintenance feature when optimum comfort level is achieved



Control Unit

WHAT ThermoTub® PROVIDES

Soothing, Thermopeutic™, Comfort

ThermoTub's advanced radiant heaters provide soothing comfort directly to the bathtub's surface. Warmth on contact, ThermoTub delivers the ultimate in comfort and relaxation. Radiant heat penetrates deep into the joints and muscles to increase blood flow while reducing pain and inflammation. Radiant warmth is very helpful for circulating oxygen in the blood and skin cell revitalization.
